Server-side website programming first steps

Created by 이 윤 준 (yoonjoon.lee@gmail.com)

May, 2019

Fundamental questions about server-side programming

- "What is it?"

- "How does it differ from client-side programming?"

- "Why is it so useful?"

- An overview of some of the most popular server-side web frameworks

- A guidance on how to select the most suitable framework for creating a site.

- A high-level introduction about web server security
